

Please note: This field day is now on Saturday 26 May

HERD FERTILITY and PRODUCTIVITY

South Coast Beef is commencing a new project offering our members and guests the opportunity to join an on-farm discussion group called **Target 969**.

Target 969 will meet each month on participants' properties over the period May-September and tackle the critical issues that impact on herd productivity and profitability.

This is a long-term project and participants will be encouraged to implement the relevant best practices in their herd and share their experiences with members of the group.

Our first gathering, when all will be revealed, will be at:

Mick and Jennifer Hamilton's,
"Oakfield"

Foxground Road, Foxground

Saturday May 26

9:15am -12:30pm

BYO: Chair

Come along and bring a partner, friend, colleague or neighbour and a chair (we'll be doing a short introduction in the shed before getting down and dirty in the paddock).

This is an opportunity that can make a real difference to how and what you do on your property. It's not just theory but very practical evidence-based, low-cost techniques that will enable you to get the best out of your pastures and your cattle.

Cost: Current SCBPA Members are FREE

Guests: \$200 for the full May – September programme.

RSVP to: Rob Stafford 0467 767 375 or email execofficer@southcoastbeef.asn.au
